

ZTT launched the fiber optic cable for FTTx application

ZTT recently launched its latest model of fiber optic cable for Fiber to the Home (FTTH) application. The product was in-house tested and manufactured as to meet today's demand in the FTTx market. It is the first Chinese optical cable manufacturer release the FTTx type fiber optic cable to the market.

The new design of optical cable sheathed with PE jacket which good for fiber protection in house environment. Furthermore, the cable is located 2 strength member in order to increase it tensile strength. Both FRP or Steel wire would be a choice in this type of cable design. Fiber counts ranged from 1c Singlmode to 12c singlmode which is ideal for the connection between household and the distribution box of the service operators.

In addition, ZTT also introduced its latest released Optical Fiber for FTTx market. The new ZFOC R15 optical fiber is a 245um diameter standard size optical fiber. Its bending radius has a great improvement to reach 15mm min. Such property of this ZFOC R15 fiber is prefect for FTTx application where require low bending radius.

Zhongtian Technologies Co. Ltd (ZTT), (SSE code: 600522) a leading corporation in fiber optic industry develops, designs, manufactures, supplies and distributes optical fiber, optical cable for indoor, outside plant, underground, aerial, non-metallic, self support, optical fiber ground wire as well as networking & splicing closures. Public listed in Stock Exchange in Shanghai and currently operating more than 6 manufacturing facilities in different site in China

ZT Optics, the worldwide business unit for telecommunication system solution of ZTT locates in Hong Kong. With its strategic strength on established financial systems, well developed business environment as well as leading position in Asia, it brings ZT unlimited opportunities to go international market.
