

**ZTT displayed the latest FTTx solution at FOE 2006**

FOE 2006 is one of the leading Fiber Optics Trade Show in Asia. More than 250 exhibitors participated on this annual event. ZTT has actively involved in this industrial program with its latest fiber optics technological product displayed. The 3 days trade show attracted more than 11,627 attendees worldwide and ZT presented its FTTx solution with actual product shown.

During this event, ZTT successfully demonstrate its professional product in Fiber Optic connection application.

Meetings were arranged to different telecommunication institutes, contractors, engineering firms as well as operators. Most of them are interested in the SUPERFLEX low bending radius Single mode Optical Fiber (ZFOC R15) and Next generation Fiber-to-the-home cable (FTTH cable). The ZFOC R15 fiber was developed to meet the harsh environment indoor application of today's FTTH market. Thanks to its super low bending radius that doubled the bending requirement in some special case indoor. No more large bending is needed indoor and it is very flexible to route along with the structure of the house or building.

The FTTH cable was developed with FRPE jacket which is flame retardant in nature. With its unique rectangular shape and v-groove design, it largely improve the crush and impact resistance of the cable while maintaining flexible bending and routing of the cable. It is ideal for FTTH application.

**Zhongtian Technologies Co. Ltd (ZTT)**, (SSE code: 600522) a leading corporation in fiber optic industry develops, designs, manufactures, supplies and distributes optical fiber, optical cable for indoor, outside plant, underground, aerial, non-metallic, self support, optical fiber ground wire as well as networking & splicing closures. Public listed in Stock Exchange in Shanghai and currently operating more than 6 manufacturing facilities in different site in China

**ZT Optics**, the worldwide business unit for telecommunication system solution of ZTT locates in Hong Kong. With its strategic strength on established financial systems, well developed business environment as well as leading position in Asia, it brings ZT unlimited opportunities to go international market.
