

PRESS RELEASE

Oct. 13, 2007

Next Generation FTTH patch cord "TIGER-I" officially released

The Next Generation FTTH patch cord "TIGER-I" is the newest product for FTTH, FTTP, FTTC, FTTB and FTTx application developed by ztoptics to address the demand of FTTx in the worldwide market. TIGER-I is compatible with conventional singlemode fiber G652D and having Zero Water Peak performance. Meanwhile, its has a super flexible bending radius as low as 15mm which is providing excellence bending performance for indoor FTTH application.

It is no doubt that over some 10 millions of FTTH subscribers facing the challenge of many bending needs at home or office when installing the services by ISP who offer FTTH. Some offices or housings are not guided to maintain 60mm diameter bending which is the standard bending tolerance of conventional singlemode fiber. Most of the Carriers or Operators are caring more on the network out of the premises while inside the premises is one of critical factor of the service success.

The newest developed TIGER-I having a flame retardant & flexible jacket with 4.0mm cable diameter which is ideal to by any non-IT professionals. Small bending radius as low as 15mm further provided convenience use of patch cord as interconnect between wall socket and ONU or PC.

For further information of TIGER-I, you may download its brochure [here](#) or contact our sales at sales@ztintl.com
